FormFactor Announces Internet Availability of Proxy Materials for Its 2008 Annual Meeting of Stockholders

LIVERMORE, CA, Apr 10, 2008 (MARKET WIRE via COMTEX News Network) -- FormFactor, Inc. (NASDAQ: FORM) today announced the Internet availability of its proxy materials for its 2008 Annual Meeting of Stockholders under the new "Notice and Access" rule adopted by the U.S. Securities and Exchange Commission. FormFactor's proxy materials can be viewed on the company's website at <http://investors.formfactor.com>.

Under the SEC's new "Notice and Access" rule, a company may satisfy its proxy materials delivery requirements by delivering a "Notice of Internet Availability of Proxy Materials" to its stockholders, providing Internet access to its proxy materials, and providing a printed set of its proxy materials by mail to any stockholder who requests them. FormFactor has elected to take full advantage of the new rule. Under the new rule, FormFactor is mailing to its stockholders of record on March 31, 2008 a "Notice of Internet Availability of Proxy Materials," instead of mailing a printed set of its proxy materials as the company has done for past annual meetings.

FormFactor filed its proxy materials for the 2008 Annual Meeting and its Annual Report on Form 10-K for the fiscal year ended December 29, 2007 with the Securities and Exchange Commission. The investment community can view these documents on the company's website at <http://investors.formfactor.com>. FormFactor's stockholders may obtain a printed copy of FormFactor's proxy materials and its 2007 Annual Report free of charge by following the instructions provided on the company's website or in the "Notice of Internet Availability of Proxy Materials."

FormFactor is holding its 2008 Annual Meeting of Stockholders on Thursday, May 22, 2008, at 3:00 p.m., Pacific Daylight Time, at the company's corporate headquarters, located at 7005 Southfront Road, Livermore, California 94551.

About FormFactor:

Founded in 1993, FormFactor, Inc. (NASDAQ: FORM) is the leader in advanced wafer probe cards, which are used by semiconductor manufacturers to electrically test integrated circuits, or ICs. The company's wafer sort, burn-in and device performance testing products move IC testing upstream from post-packaging to the wafer level, enabling semiconductor manufacturers to lower their overall production costs, improve yields, and bring next-generation devices to market. FormFactor is headquartered in Livermore, California with operations in Europe, Asia and North America. For more information, visit the company's website at www.formfactor.com.
